

Fund Overview

The Waypoint All Weather Alternative Fund is our core public equity portfolio that is designed to deliver superior risk-adjusted returns across market cycles. It is comprised of capital distributors and compounders with a volatility overlay to reduce the impact of market drawdowns.

The strategy provides institutional grade diversification via uncorrelated returns with low volatility & drawdown risk. Our portfolio management team has been managing the strategy for the past 10+ years in segregated accounts and now offer access through the fund with daily liquidity.

Fund Commentary

The Waypoint All Weather Alternative Fund was -2.31% for the month (+5.50% YTD) vs. 2.77% (+7.57) for the S&P TSX Total Return Index.

Equity markets were strong in the month of May despite mixed data south of the border that led to uncertainty surrounding the Fed's future rate decisions. A lower-than-expected April CPI was offset by higher-than-expected demand for durable goods. By month end, there was a less than 50% chance that the US central bank would cut rates in its September meeting. Following month end, however, the BOC announced it would lower its policy rate to 4.75%, signalling that underlying inflation is continuing to improve.

Positive performance from the portfolio's information technology exposure was more than offset by weakness in the derivative position.

We continue to feel we are well positioned given the portfolio's longer tenor option position and meaningful weights in our highest conviction names.

We thank you for your on-going support.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemptions, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. Performance for a period of less than a year is non-annualized.
